

BUILD MY DREAM HOUSE PROJECT

DIRECTIONS

Create a blueprint for your dream home.

1. Create copies and print out the desired number of room sections.
2. Cut out each section and tape together to create your perfect house layout.
3. Assign each room its own color, then make a list to keep track of your color code.

SUPPLIES NEEDED

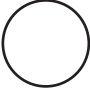

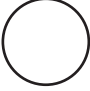

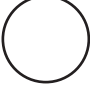

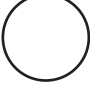

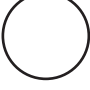

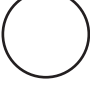

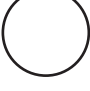

- Scissors
- Crayons
- Tape

TIP

Have kids list the rooms in their dream home and create a color-coded key.

BUILD MY DREAM HOUSE PROJECT

A large rectangular area defined by a dashed line, intended for drawing a house. The grid is divided into several sections by internal dashed lines: a large vertical rectangle on the left, a smaller vertical rectangle on the right, and a horizontal section at the bottom that spans across both vertical sections. This layout is designed to help a child plan the layout of a house, such as the placement of rooms and a porch.
